Subject Index of Volume 142

Additives
effect of additives on corrosive wear of carbon steel, 31
Adhesion
adhesion and wear in miniature plastic bearings, 185
Alloys
effect of operational variables, microstructure and mechanical properties on the erosion of Ti–6Al–4V, 253
Automated image analysis
the use of automated image analysis for the study of wear particles in oil-lubricated tribological systems, 107

Bacteria
modification of ferrography method for analysis of lymphocytes and bacteria, 135

Carbides
the microstructural changes in the surface layer of gun barrels, 87
Carburizing
a comparative study on the performance of differently treated plain carbon steel gears, 239
Cavitation
scanning electron microscopy observation on the incubation period of vibratory cavitation erosion, 303
Ceramics
friction and wear of ultrahigh molecular weight polyethylene against various new ceramics, 43
R curve effects in solid particle erosion of ceramics, 115
Chromium
dry sliding wear of grey iron laser surface alloyed with 14%–40% chromium, 383
wear phenomena in the system TiN-coated high speed steel disk against a chromium steel pin, 151
Coal
numerical simulation of tube erosion by particle impaction, 171
Constant load
pure squeeze action in an isothermal elastohydrodynamically lubricated spherical conjunction. Part 2. Constant speed and constant load results, 17
Corrosion
effect of additives on corrosive wear of carbon steel, 31

Drilling
some observations of surface integrity of deep drilling holes, 331
Dynamic load
pure squeeze action in an isothermal elastohydrodynamically lubricated spherical conjunction. Part 1. Theory and dynamic load results, 1

Elastohydrodynamic lubrication
compressible elastohydrodynamic lubrication of rolling and sliding contacts with a power law fluid, 315
Electrorheological fluids
hydrodynamic pressure generation with an electrorheological fluid, 373
Erosion
effect of operational variables, microstructure and mechanical properties on the erosion of Ti–6Al–4V, 253
R curve effects in solid particle erosion of ceramics, 115

Failure
fretting failure of electroplated gold contacts, 265
Ferrography
modification of ferrography method for analysis of lymphocytes and bacteria, 135
Fretting
fretting failure of electroplated gold contacts, 265
sliding wear and fretting fatigue resistance of amorphous Ni–P coatings, 291
unlubricated reciprocating wear of stainless steel with an interfacial air flow, 351

Elsevier Sequoia/Printed in The Netherlands

Friction
friction and failure of electroplated sliding contacts, 57
friction and wear of ultrahigh molecular weight polyethylene against various new ceramics, 43

Gears
a comparative study on the performance of differently treated plain carbon steel gears, 239
Gold
fretting failure of electroplated gold contacts, 265
friction and failure of electroplated sliding contacts, 57

Hydrodynamic pressure
hydrodynamic pressure generation with an electrorheological fluid, 373
Hydrodynamic sector bearing
measurement of the lift force developed in an oscillating and translating hydrodynamic sector bearing, 227
Hydrogen chloride
delay of pitting by hydrogen chloride dissolved in a lubricating oil, 97

Image analysis
computer image analysis for identification of wear particles, 213
Iron
dry sliding wear of grey iron laser surface alloyed with 14%–40% chromium, 383

Lift force
measurement of the lift force developed in an oscillating and translating hydrodynamic sector bearing, 227
Lubrication
measurement of the lift force developed in an oscillating and translating hydrodynamic sector bearing, 227
the use of automated image analysis for the study of wear particles in oil-lubricated tribological systems, 107
Lymphocytes
modification of ferrography method for analysis of lymphocytes and bacteria, 135

Nickel
friction and failure of electroplated sliding contacts, 57
sliding wear and fretting fatigue resistance of amorphous Ni–P coatings, 291

Particle impaction
numerical simulation of tube erosion by particle impaction, 171
Phosphorus
sliding wear and fretting fatigue resistance of amorphous Ni–P coatings, 291
Pitting
delay of pitting by hydrogen chloride dissolved in a lubricating oil, 97
Polyethylene
friction and wear of ultrahigh molecular weight polyethylene against various new ceramics, 43
Power law index
compressible elastohydrodynamic lubrication of rolling and sliding contacts with a power law fluid, 315

R Curve effects
R curve effects in solid particle erosion of ceramics, 115
Rolling-ball method
delay of pitting by hydrogen chloride dissolved in a lubricating oil, 97

Slide-to-roll ratio
compressible elastohydrodynamic lubrication of rolling and sliding contacts with a power law fluid, 315
Sliding
friction and failure of electroplated sliding contacts, 57
sliding wear and fretting fatigue resistance of amorphous Ni–P coatings, 291
dry sliding wear of grey iron laser surface alloyed with 14%–40% chromium, 383
Splat cooling
the microstructural changes in the surface layer of gun barrels, 87
Squeeze action
pure squeeze action in an isothermal elastohydrodynamically lubricated spherical conjunction. Part 1. Theory and dynamic load results, 1

pure squeeze action in an isothermal elastohydrodynamically lubricated spherical conjunction. Part 2. Constant speed and constant load results, 17
Stainless steel
scanning electron microscopy observation on the incubation period of vibratory cavitation erosion, 303
unlubricated reciprocating wear of stainless steel with an interfacial air flow, 351
Steel
a comparative study on the performance of differently treated plain carbon steel gears, 239
effect of additives on corrosive wear of carbon steel, 31
wear phenomena in the system TiN-coated high speed steel disk against a chromium steel pin, 151
Steel–polymer bearings
adhesion and wear in miniature plastic bearings, 185
Surface roughness
some observations of surface integrity of deep drilling holes, 331
Titanium
effect of operational variables, microstructure and mechanical properties on the erosion of Ti–6Al–4V, 253
wear phenomena in the system TiN-coated high speed steel disk against a chromium steel pin, 151
Tube erosion
numerical simulation of tube erosion by particle impaction, 171

Wear
unlubricated reciprocating wear of stainless steel with an interfacial air flow, 351
Wear debris
computer image analysis for identification of wear particles, 213
the use of automated image analysis for the study of wear particles in oil-lubricated tribological systems, 107
White-layer formation
the microstructural changes in the surface layer of gun barrels, 87
